

**d·gen, Inc** is involved in the development of the Korean industrial business since the 1980s as one of the key players in industrial automation and CAD/CAM solutions.

Today d·gen is concentrated on the R&D, manufacturing and distribution of inkjet printing systems for graphic, textile and industrial applications. Digital printing enables users to print and decorate on-demand and just-in-time, regardless of the quantity, size and shape of substrates, such as wood, metal, glass, plastic, ceramics and textile, with no pollution, makeready times and costs. d·gen has also access to one of the most advanced color and quality management technologies.

We are looking for a mechanical field engineer with the following job conditions:

**Responsibilities:**

- Providing service and customer support during field visits or dispatches.
- Managing all on site installation, repair, maintenance and test tasks.
- Diagnosing errors or technical problems and determining proper solutions.
- Sales support while attending exhibitions and build positive relationships with customers.
- Produce timely and detailed service reports.
- Cooperate with technical team and share information across the organization.

**Requirements:**

- Intermediate or high level of English (spoken and written).
- Good analyzing and problem-solving skills.
- Ability to work flexible shifts and to adapt to changing work schedules.
- Ability and interest to travel in EMEA (Europe, Middle East, Africa) countries

**Benefits:**

- Gain a whole new experience in an Asian working environment.
- Chance to travel to many countries.
- Technical training courses in Korea will be provided.
- Experience that will boost your professional career.

**Contact for application and further questions:**

**Peter Tóth**

*EMEA Senior engineer*
